-" A Citizen" complains in a commu ntestion addressed to the local, that he went to Court Square yesterday morning at nine o'clock, and could not get in, find-ing the gates locked. If this is true, the keeper of the Park should try to rise a little earlier. The Park is public proper-ty, and everybody has a right to enter it -Few of our Union street and "down

town" merchants generally can afford the time, even in dull seasons, to leave their business in the middle of the day to run off to a res_aurant for a lunch. And, indeed, what is the use, when our neigh-bor, Madame Vincent, No. 18 Union, sets every day, from 18 to 2 o'clock, a hot lunch like a fine dinner, splendid soup, elegant beef, potatoes, salad, etc., and all free graits for nothing. Her liquors and cigars are famous for their excellence.

...It has been known that the simples method of sharpening a razor is to put it for half an hour in water, to which has been added one-twentieth of its weight of muriatic or sulphuric acid, then lightly wipe it off, and after a few hours set it on hone. The acid here supplies the place of a whetstone by corroding the surface evenly, so that nothing further than a smooth polish is necessary. The process never injures good blades, while badly

it, although the cause of the improvement remains unexplained. Of late this process has been applied to many other cutting implements.

The earth and sir seem teeming with myriads of spring insects just awakening from their winter sleep, or being batched to life by the vivilying heat of the sun. The pavements were covered with long lines of winged and black ants in many portions of the city yesterday and day before. At this season of the year there is no pest more annoying to the house-very than these same ants. There has portions of the year there is no pest more annoying to the house-keeper than these same ants. There has never yet been a "safe" made for holding sweet-ments, sugar, etc., that was proof against them. A hint, therefore, of a means of destroying them by the whole-made may be valuable to housewives and others annoyed with them. Take a sponge—one with rather large cells is preferable—and, after having first washed it clean, dip it m "sugar-water" (made by dissolving a couple of table spoonsful of sugar in two cups of water.) Wring or press out the water and place the damp sponge in the place infested with the little pests. They will soon congregate in and on it in thousands, and when it is quite full drop it in scalding water. Rinss out the dead ants, "bati" and set again. It is surprising in what a short space of time what countless myriads may be thus destroyed.

MEMPHIS, April 22, 1870. Editors Appeal: Let me once more ap-peal to the good citizens of Memphis; let me ask them it they will not come forward and give a "helping hand" now, in bringing the enterprise of the Marine and Industrial Exhibition forward with a tirely free from partisan violence and bitoperation? Yes, I think there is. All it needs is for the business and practical men to concentrate and put the "shoulder to the wheel" (like they did in the or-ganization of the Memphis Mechanics' institute—an institution which is bound to succeed), and my word for it, the Ex-hibition as proposed will certainly pros-per, and finally become a fixed fact among na. I repeat, will the citizens, the men of capital and the men who have their whole interest here at stake, come forward and take stock in this incorpora-tion and thereby help along the further-ance of this contemplated exhibition and fair for the city of Memphis? Or would they rather see a rival city come and put its claws upon it and take away the Memphis can and ought to have this

grand proposed Marine and Industrial Exhibition secured to her; and, if so, it will prove the life, nay, the very salvato her future prosperity. Let u
